Question **24**

Not answered

Marked out of 1.00

Read the following passage from the lesson "The Treasure Within–Part-II ".

My mother said, "Don't join the police force, just do your graduation!" So I went to Jai Hind College in Bombay.

Hafeez stumbled on architecture because he knew little French and less German. He was offbeat even in the pranks that he played. When he found his calling, there was no looking back.

BR : How did you get into the field of architecture?

HC : In the college for architecture, nobody who had got below 80-85 percent was allowed to enter. I had only 50 per cent.

I wanted to join the Army. I got my admission letter but my aunt tore it up. Then I decided that I wanted to join the police force.

My mother said, "Don't join the police force, just do your graduation!" So I went to Jai Hind College in Bombay.

There, I was to take either French or German. Though I had studied French for seven years, I did not know seven words of French. So I took German. Then my German teacher died. The college told me that I could change the college or take French. Now, who would give me admission in another college? I had got admission to Jai Hind by influence. So I thought, 'Okay, I will take French' and I started learning French again. I learnt it from my cousin. She was an architect's wife. I was going to the architect's office to learn French!

BR : Was it then that you decided you wanted to do architecture?

HC : Actually, it all happened quite by chance. In the architect's office, I saw somebody drawing a window details. A window detail is very advanced drawing.I told him that his drawing was wrong- that the window he had drawn would not open. He then had a bet with me and later he found that indeed, his drawing was wrong! My cousin's husband was surprised. He asked me to draw a few specific things, which I immediately did.

Now answer the following questions. Each question has 4 choices. Choose the correct answer.

1. Meaning of architecture is

- a. Designing a building
- b. Selling a building
- c. Constructing a building
- d. Demolishing a building

The correct answer is: Designing a building
